S.Sgl.Mames McNab, lefl, and LI. Col. George R. Sparks take Capt. AI Tiehenor on a lough trip from the instructor's control panel of the Air National Guard's complex K102 flight simulator. The jump seat permits an observer to monitor a student's reactions inside the closed cockpit. Tichenor is shown inside the cockpit with the canopy raised in the pholo at the right. Bee 1'hofos by Edward C. Nuld Fuel PinWi Mis ANP//ofs Out Of Sky By Gene Kuhn Air National Guard fighter pilots are logging an in-  $\hat{A}$  creased number of hours in a\* wild yonder changed from blue to black ns a result of the fuel flap. As one of several conscr-... vation measures ordered by Col. James Kilpatrick. commander of the 144th Fight-, er Interceptor Wing, their actual f l y i n g lime has been cut while Ihc requirement fur simulated flight train-  $\hat{A}$  ing has been doubled to four hours a month. "That doesn't sound like much in time, but, boy. that's a helluva lot of work," commented I.t Col. Â. Edward R. Aguiar', commander of Hie wing's Fresno-based 144th f i g h t e r Interceptor Group. Thc.work is laid on by in-.striiclors. aided by a complicated electronics system. From their control panel they can feed a pilot problems and situations on a single, short "flight" he probably -- and hopefully -- would not encounter in a lifetime of flying. The pilot is in an exact reproduction, o't an K102 = cockpit, which', vv.ith the canopy closoii, is; j M u m i n a l - ud only by i-he iglow Jronv instruments--provided t h e 'instructors have not set' him up w i t h power faUufcs or unless he \*isV Hying through a severe" elcelriual storm, which e;ui.be.simu- lated? by menus (if higii intensity strobe lights. / . "TIVc simulator can make .him react to any emergency or combination pi emergencies," Aguiar said. "Tlic simulator will lo anything an airplane will do. "It can even crash." Thei simulator also can be hailed at any time, perhaps in the middle of a spin, the pilot told he is not following the right r procedure to  $\hat{A}$  pull the aircraft out. and  $\hat{A}$ . The spin resumed at: Ihe 'point it'was slopped. '.  $\hat{A} \cdot \langle Or, Agui ar continued, a' \hat{A} \cdot j pilo'i can-bo-flying what appears to be a normal flight. when suddenly the <math>\hat{A} \cdot fire$ warning light flashes on :-ujid, smoke; --real smoke,  $\hat{A} \cdot \hat{A} \cdot \hat{A}$  not simulated --begins to fill the cockpit. A" perverse instructor ." can confront a pilot with a v, .Combination of. inalfunc- tions that would make it impossible or highly unlikely that he could return to base unaided by ordering complete power generator and hydraulic failures. In actual flying, another airplane would be sent aloft to guide, the stricken plane toward a safe landing, ' Aguiar said. Then there are "emergency ground egress drills" 'and ejection procedures in which the pilot as a last, resort punches out. Compressed

air-is-used to simulate the ejection, but the pilot and the canopy stay with-tlic simulator. Nevertheless, the pilot gets "a pretty good thump," Kilpatrick said. The wing's oilier groups in Ontario and Boise, Idaho, also have been ordered to make maximum use of their simulators. ' "There's nothing like flying the airplane, but nothing in the cutback will degrade our combat readiness or overall flying proficiency," Kilpatrick said. Ot her fuel-saving measures at the Fresno base include the installation of special switches t h a t cut off heaters and blowers when the hangar dours arc opened; installation of walk-in doors on buildings equipped with large roller doors to prevent heat loss; setting thermostats at minimums in unused offices and at 68 degrees in others; a 50 mile an hour speed limit on vehicles and a prohibition against cross- country flights except on essential missions. By Joe Hosato Kresno County supervisors today moved closer to adoption of an ordinance regulating campaign spending and contributions despite strong objections by County Counsel Robe'rt M. Wash. Wash told the supervisors because of the possibility of self inerimination. the ordinance "will not fly. It's not a good ordinance." The board set Jan. 8 for the first reading of the measure. A second reading and adoption is expected a week later. Wash warned of UC Supreme Court decisions which hold, in effect, "that compelling reporting of- something which might disclose a criminal offense is a violation of the constitutional provision against self inerimination." - He said (he court has held that the federal government cannot compel the registration of certain firearms such as sawed-off shotguns because "if a person pleaded self incrimina- (juestion of board policy^:From a practical stand-, point, Krebs said it appears the ordinance will work : to limit spending. Basically, the proposal will limit to 520,000 the amount tha t can be spent by a candidate running for a countywide office in each election. Incumbents will be limited to 518,000. It will limit candidates for super-'visor to \$15,000 and incumbent supervisors to 813,500. The ordinance will also: include limits on campaign contributions. The prdi-'nance will limit maximum contributions to a candidate by any person or entity to not more t h a n \$250.: And, the maximum contriv tuition for or against a' countywide measure will he limited to not more t h a n S2oO from any person or entity.
